neostella delivers enterprise-scale legal case management

When firms reach enterprise scale, they often assume the only way forward is to custom-build legal operations on a CRM platform, such as Salesforce. At that scale, CRM platforms commonly:

Cost \$200K–\$2M in implementation for complex legal environments (Forrester).

Require full-time platform administration, often costly.

Still force legal work into CRM-native schemas and workarounds.

Trusted by enterprise firms to support

500k+
cases in a mass
tort environment

350+
employee mass
tort firms

500+
employee PI firm

how neostella handles scale.

graph database

Graph model built for relationships, connecting cases, people, providers, events, documents, and financials.

Optimized for high-volume, deeply connected data.

Eliminates the need to flatten data complexity into rigid tables or workarounds.

custom data model

Unlimited objects and relationships.

No forced constraints.

Scales cleanly as data and processes evolve.

Streamline go-live and operations through prebuilt templates.

enterprise-grade governance

Granular permissions down to object and field-level.

Contextual permissions and access across the application.

Select from all United States, Europe, or Canadian AWS hosting contractually guaranteed.

open integrations

Open, shared API.

Real-time webhooks.

Kafka-based event streams.

Enables event-driven architecture and a true system of record.

no-code workflows and automation

Map workflows and build automations across connected applications.

Create complex flows with nested workflows, branching, milestones, and more.

reporting designed for large datasets

Permission-aware reporting across any object or data point.

Supports reports with hundreds of thousands of rows and dozens of columns, without timeouts or degraded performance.

Long-running reports complete and notify users when ready.

search built for speed and scale

Fast, relationship-aware and permission-aware search..

Reliable performance under heavy load.

Optional AI-assisted search for faster insight across connected data.

proven scale benchmarks.

1M+
cases supported

10M+
contacts

100M+
documents

-1 sec
response to
standard endpoints

With Neostella, firms aren't rebuilding legal case management inside a generic platform. Implementation is typically faster, simpler, and more cost-effective, with enterprise-grade scale built in from day one.
